AB - J58210960 Compsn. comprises (A) 60-95 wt.% linear polyester comprising

(A1) acid mixt. comprising 20-80 mol.% terephthalic acid or its ester,
20-80 mol.% isophthalic acid or its ester and 0-40 mol.% aliphatic
dicarboxylic acid; (A2) glycol mixt. comprising 0-95 mol.% ethylene
glycol, 5-100 mol.% neopentyl glycol and 0-40 mol.% diethylene glycol;
and (A3) polyfunctional cpd. contg. alkali metal sulphonate and/or
alkali metal carboxylate in amt. 0.01-10 mol.% of the acid mixt.; and
(B) 5-40 wt.% melamine cpd.

- The aliphatic dicarboxylic acid is pref. malonic or succinic acid or
anhydride, adipic, glutaric, adipic, pimelic, suberic, azelaic or
sebacic acid. (A3) is pref. sulpho-Na-, sulpho-K-phthalate,
-terephthalate or isophthalate, mono-alkali metal benzene
tricarboxylic acid, dialkali metal benzene tetracarboxylic acid,
alkali metal salt of dimethylpropionate or alkali metal salt or
hydrogenated dimethylol propionic acid. (B) is pref. examethoxy-,
-ethoxy-, -propoxy-, -butyoxo-, -pentoxy- or
hexyloxy-methylmelamine.(0/7)

IW - POLYESTER COMPOSITION IMPROVE DISPERSE COLOUR MATERIAL COMPRISE LINEAR
POLYESTER CONTAIN ALKALI METAL SULPHONATE CARBOXYLATE MELAMINE COMPOUND
